THE CENTRAL REGION  
Of the  
NATIONAL CAVE RESCUE COMMISSION  
Of the  
NATIONAL SPELEOLOGICAL SOCIETY, Inc.  
And the  
MINNESOTA SPELEOLOGICAL SURVEY  
Present  
An Orientation to Cave Rescue  
August 4-5, 2007  
Spring Valley Fire Hall—Spring Valley, WI

**About the seminar:**

This is an introduction to cave rescue. Topics covered include Incident Command System and how it applies to cave rescues, medical management, hypothermia, patient packaging, extreme situations, the cave environment, communications, media interaction, search, and more. There will be both classroom and hands on instruction, and the students will run a mock incident.

**Prerequisites:**

There are no prerequisites for this class. This is designed for anyone who has an interest in cave rescue management and operations. Both recreational cavers and emergency response personnel will benefit from this class.

Those under 18 will need to call the seminar coordinator to make prior arrangements to attend if not accompanied by a parent or guardian.

**Seminar Cost:**

The seminar cost is \$35. Lunch on Sunday will be provided. To help keep costs low, all instructors are volunteers. Make checks payable to NCRC-CR Seminar.

**Where:**

Spring Valley Fire Hall—407 S. Newman Ave., Spring Valley, WI. Map on reverse.

**When:**

Saturday, August 4 and Sunday, August 5. Check-in and late registration—August 4, 7:30am. Classes begins at 8:00am.

Free camping is available at Crystal Cave—one mile west of the fire hall on Rte. 29

W965 Rte. 29, Spring Valley, WI 54767

-----✂ cut here and mail in the above form with payment ✂-----

All class equipment will be provided except for personal equipment.

Students are required to have the following available for inspection at check in:

- UIAA or CE approved climbing helmet with a three or four point suspension system, and non-elastic chinstrap.
- Three sources of light, at least two must be electric, one helmet mounted and one more capable of being helmet mounted. All should be sufficient to allow you to exit the cave. Carbide will NOT be allowed when working near patients or in close quarters with groups of people, or with ropes, but is acceptable for use in other conditions.
- Rugged clothing. Sturdy, lugged sole boots. Gloves with leather palms.
- A small, heavy-duty personal pack.
- Water bottle, at least one quart.

Additional Recommended Equipment:

- 20' 1" Tubular webbing
- 3 Plastic garbage bags
