

NSS RULES FOR CAVE ACCESS: MYRNA ATTAWAY NATURE PRESERVE

The National Speleological Society (NSS) is a non-profit membership organization dedicated to the scientific study of caves and karst; protecting caves and their natural contents through conservation, ownership, stewardship, and public education; and promoting responsible cave exploration and fellowship among those interested in caves.

NSS Nature Preserves are our commitment to future generations and ensure cave conservation, access, education, and exploration. Each NSS Nature Preserve is managed by a team of volunteers who provide oversight, maintenance and management while serving as the interface as representatives of the NSS.

The following guidelines have been established to protect cave and karst resources, promote good relations, and provide an enjoyable visit. Please observe the rules and encourage others to do the same so the unique and outstanding cave and karst features found on this and other NSS properties may continue to be enjoyed by all.

I understand and acknowledge:

That all visitors must obtain an access permit and sign a release and disclaimer before entering the cave. Additionally, individuals under the age of 18 years must have a parent or legal guardian sign an indemnity agreement and waiver. A permit may be obtained by contacting the Preserve Management team at AttawayPreserve@caves.org.

That the persons visiting the preserve or caves are not required to be NSS members but are encouraged to join and support our mission of conservation, exploration, research, and fellowship. When requesting a permit, the identity of the caver who will guide and be responsible for the activity of the group must be provided. A permit will be issued in that person's name and they will be responsible for ensuring that all group members abide by the terms of the permit and the management plan.

That all caves, even permitted caves are completely "wild" and no improvements have been made or are desirable. I understand that a visit to a wild cave may involve certain risks including but not limited to those listed herein. I desire to visit this Cave and will do so completely at my own risk and pursuant to Tennessee Recreational Use Statute.

That any cave may be physically demanding and declare that I am fit and able to engage in the necessary activity to access a cave's features. I also acknowledge that a cave may contain passages, rooms or pits that may be dangerous to access and/or may not be known and there is the possibility of becoming lost. If a cave requires vertical rope work, I am sufficiently healthy and capable of completing the activity and not endangering myself or other group members.

That caves may flood, and that it is impossible to predict the time lag between rainfall and flooding in the cave. I will not enter the cave when the weather is questionable, or ground thaw could occur. Doing so could result in death by drowning, hypothermia, or entrapment.

That steep, slippery mud banks, exposed climbs, and loose rocks may occur in various locations in caves and may pose hazards.

That water in a cave may be polluted by unknown means and may be dangerous by contact or if ingested.

That the minimum group size for cave visitation is 3 people. To minimize impact on the cave, the property and wildlife, group size is limited to no more than 10 people on an in-cave trip. Group sizes for surface activities are set by the NSS Preserve Managers.

That parking is limited to designated areas and trailheads or public roadways. I will not block driveways or other vehicles.

That camping in a cave or on the preserve is allowed but prohibited in the cave. Fires are only allowed in the designed fire ring. Please bring your own firewood. Cutting down trees on the preserve is prohibited.

That all visitors are required to pack out all waste. Only research-dedicated equipment, guidelines, and sampling plot markers shall be installed and left within the cave. Other research materials may be installed and left in the cave or above-ground on the preserve only with written permission from NSS Preserve Managers and after obtaining approval for the research from the NSS Cave Management Research Committee.

That loud noises could disturb wildlife, other visitors and neighbors and should be avoided.

That smoking and vaping in a cave is not allowed and that alcohol, recreational drugs or other intoxicating substances are prohibited during any caving activity within the preserve.

That the use of caves or karst features on NSS property may not be used for any commercial activity or purpose including guided or commercial caving or other similar activity known as "cave for pay." Groups affiliated with a class, or educational facility are welcomed and encouraged to visit the preserve.

That the collection, removal, altering, and/or destruction of any cultural or historical resources, including but not limited to, human remains, cave art/drawings, or other archaeological resources or features is not allowed. Any observation of a cultural or historical artifact should be reported to NSS Preserve Managers with specific location information, descriptions of the object(s) and photographs.

That the collection or removal of wildlife, plants, minerals, or other items found in the cave or on the property, including scientific specimens is not allowed without the express written permission of the NSS Preserves Committee.

That the modification of a cave or property, including the digging out of crawlways or entrances, placement of bolts or other artificial anchor, ladders, or other gear is prohibited without express written permission from the NSS Preserves Committee.

That the Grundy County Sheriff's office (1-931-692-3466) should be contacted first if any disturbances, vandalism, or illegal activities are observed within the Preserve. Upon informing the appropriate legal authority, the NSS shall be notified as soon as possible. Additionally, any site problems in or around the cave, the cave opening or the land surface area above a cave and its entrance shall be shared with the NSS Preserve Managers at the first available opportunity.

That the Grundy County Sheriff's office (1-931-692-3466) should be contacted first if any rescue or emergency should arise on the property. Upon informing the appropriate legal authority, the NSS Preserve Manager shall be notified as soon as possible.

Failure to abide by these "rules for cave access" may result in immediate removal from the property and/or result in future access denials and/or appropriate civil or legal recourse or compensation for damage or abuse to the cave system or features.

I acknowledge that I have read the provided access rules and understand them.
