

# **Archeology and Paleontology Session**

## **CALL FOR PRESENTATIONS**

**2023 NSS Convention    Elkins, West Virginia**  
**June 26-30, 2023**

This is a call for presentations for the Archeology and Paleontology Session at the 2023 NSS Convention.

The Session will highlight recent discoveries and scientific research in archaeology and paleontology in caves and karst environments. The session is relatively informal and is open to presentations from all geographic regions and chronological eras. Cavers and other researchers will have an opportunity to discuss their various finds and projects with the NSS community, foster understanding, and build bridges between people interested in caves, their human histories, cultural features, and preservation.

The session is going to be on **Thursday afternoon, June 29.**

The session will be chaired by Joe Douglas. Abstracts can be emailed to him at [Joe.Douglas@volstate.edu](mailto:Joe.Douglas@volstate.edu). Presentation lengths are normally 20 minutes, but some 25 or 30 minutes slots may be available depending on the number of presentations submitted.

Your abstract must be limited to 250 words. Write your abstract as a summary of your conclusions and results, not simply a statement of what you are going to talk about. Also, please let Joe how much time you will need for your presentation and whether you need any special equipment. Please provide each author's name and email address. The author's affiliation and/or mailing address can be included if desired.

If you have questions about the session please contact Joe Douglas at [Joe.Douglas@volstate.edu](mailto:Joe.Douglas@volstate.edu)

**The submission deadline for abstracts is May 15, 2023.**
