

Geology and Geography Session

Call for Presentations

2023 NSS Convention

June 26-30

Elkins, West Virginia

This is a call for presentations for the Geology and Geography Session at the 2023 NSS Convention. This session will be all day on Friday, June 30.

Each year, the Geology and Geography Section of the NSS hosts talks featuring the latest research in geology, hydrology, speleogenesis, and many other topics related to caves and karst. All abstracts will be considered for oral presentations unless a poster presentation is specifically requested. At this time, we have not reserved poster space, but could accommodate a poster session if there is sufficient interest and enough advance notice is given to convention organizers. As we did last year, we also encourage interested researchers to bring posters from other conferences such as GSA, AGU, and ICS that may be of interest to attendees at convention. This provides an additional opportunity to share your work with your colleagues.

Presentation lengths are 20 minutes, including questions.

The session will be chaired by Katie Schmid. Abstracts can be emailed to her at kschmid3@gmail.com.

Abstracts may be **no more than 250 words in length** (this limit must be strictly met). In addition to the text, the abstracts should contain the title of the paper, and the name(s), address(es), and email address(es) of the author(s). The abstracts should be informative summaries that include the conclusions, and not lists of topics that "...will be discussed." Bibliographies and references should not be given in the abstracts.

The deadline for submitting abstracts is May 15.

If you have any questions about the session, please contact Katie Schmid at kschmid3@gmail.com.

Check the convention's website, <https://caves.org/convention/2023-nss-convention/> for additional information.
